

## Installing PC Prayer Reminder from the Self-Extraction file

PC Prayer Reminder is distributed in a self-extracting file called PCPray.exe

PCPray.exe

To start the self-extraction process, double click the icon after you download it to your system.

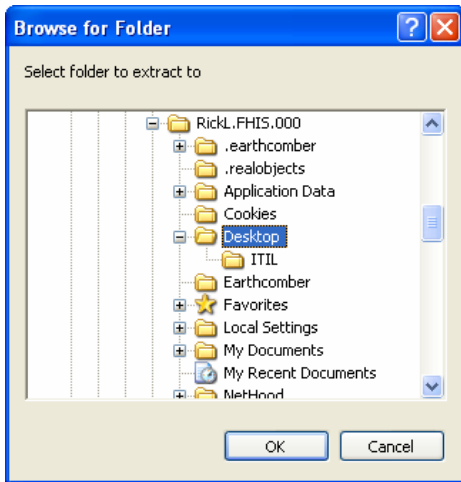

In the “Extract to path:” text box, enter a path to place the files listed in the window above this text box (the PC Prayer Reminder setup files). Click the Select button to see a dialog box (shown below as “Browse for Folder”) in which you can find/point to a specific folder to extract the PC Prayer Reminder files into.

Once you have identified a folder path, click the “Extract all files” button. Go to the folder you used in the “Extract to path:” text box and double click the setup.exe icon to start installing PC Prayer Reminder.

Select a folder from the dialog box and click OK.
